A Year of Great Success: Investing in the Future of Jump Rope

The International Jump Rope Union (IJRU) is excited to share the financial results from the 2025 World Championships! We are delighted to forecast **net profit of ~USD \$547,000**.

This great result shows that we successfully followed our planned strategy and that our sport is **growing stronger around the world**.

Our main aim for 2025 was to build a healthy financial base and **this strong foundation ensures we can better improve the quality of our sport and provide effective, long-term support to our National Governing Bodies (NGBs)**.

We are creating a **Strategic Reserve Fund** to make sure the IJRU is secure in the long term, as planned in our Strategic Plan. This strong financial position gives us the stability and resources we need for our most important job: **supporting grassroots development and global expansion**.

Our Commitment to Growing Jump Rope at the Grassroots

The cash generated from the 2025 World Championships **is immediately being put to work** to fund several key programs designed to secure the future of our sport by increasing participation at the foundational level and strengthening our professional management globally.

Here is how we will use these funds wisely:

- **New National Governing Body (NGB) Support:** We will help identify, support, and provide necessary assistance to **new and emerging NGBs** in developing regions. This helps jump rope grow in more countries!
- **Better Coaching and Judging Certification:** We will continue to invest in effective methods to continue our global certification programs. This will help us **build a larger and deeper pool of qualified and passionate leaders**.
- **NGB Grants:** We will partner with our NGBs to support essential jump rope activities to **schools and community centers**, especially those with limited resources.

Why Our Financial Results Were Stronger Than The 2023 World Championships

The unique destination of Kawasaki, Japan, drove significantly higher attendance and event registration by a larger number of delegations than in the past. This drove higher revenue than initially planned.

Thanks to a combination of disciplined management, partnership with our local JJRU colleagues, using smart digital tools, and strong project delivery, we **controlled our expenses carefully**:

- **Lower Travel Costs:** Our initial budget conservatively accounted for travel. However, by improving our global partnerships and consolidating administrative travel, we saved a significant amount in budgeted expenses.
- **Successful Digital Transformation:** Investing in new digital platforms for IJRU systems, administrative tasks, and virtual meetings allowed us to operate at a lower cost while **increasing our efficiency and global reach**.

In conclusion, the 2025 World Championships financial performance has delivered precisely the **strategic financial buffer** the IJRU required to confidently launch its next phase of global development. We are now financially stable and ready to dedicate ourselves fully to our mission of global growth.

Our Call to Action to You

We ask for your continued support and collaboration in two key ways:

1. **Embrace New Support:** We encourage all NGBs to actively engage with the support programs, and certification improvements detailed in our financial report. Let us know how we can best assist your local growth.
2. **Champion Global Growth:** Share the excitement of this progress within your regions. Your passion is the most powerful resource we have to help jump rope reach new communities and new heights.

Thank you for your trust and commitment. Together, we are building a strong, secure, and bright future for the International Jump Rope Union!

Regards,

Luke Winstanley
IJRU Treasurer
